

Replication files for “Philosophers and economists agree on climate policy paths but for different reasons”.

By Frikk Nesje, Moritz A. Drupp, Mark C. Freeman and Ben Groom

This document provides a guide for replicating results reported in “Philosophers and economists agree on climate policy paths but for different reasons”. We can make available all data in a format that maintains the anonymity of individual respondents.

The replication package contains the following additional files:

- “Survey_data.dta” is a dataset that contains the survey data. The dataset is also available in csv and xlsx format.
- “DICE_runs_for_Fig2.dta” is a dataset that contains the transposed DICE output used to produce Figure 2, based on the model and code by Hänsel et al. (2020 Nature Climate Change 10, 781–789, <https://doi.org/10.1038/s41558-020-0833-x>).
- “DICE_runs_for_Fig3.dta” is a dataset that contains the transposed DICE output used to produce Figure 3, based on the model and code by Hänsel et al. (2020 Nature Climate Change 10, 781–789, <https://doi.org/10.1038/s41558-020-0833-x>).
- “Variables.xlsx” describes variables in the datasets above.
- “Fig1b_SI1_SI2” produces Figures 1b, SI1 and SI2.
- “Fig1a_c-g.R” produces Figures 1a and c-g.
- “Fig2.do” produces Figure 2.
- “Fig3.do” produces Figure 3.
- “Tab1_2_SI1.do” produces Tables 1, 2 and SI1.
- “In-text_statements.do” replicates the in text-statements on statistical tests.
